If you couldn't tell already, DB is ready for summer – and this country inspired fabric from Silver State is making us wish for it even harder.

With an air of relaxation, warmth and comfort, the new Country Living outdoor Sunbrella collection reminds us all of life's simple pleasures, which often bring to mind images of the outdoors. Inspired by pages from the popular consumer magazine of the same name, the Country Living collection focuses on the traditional American home.

"The designs are clean; the colors are refreshing, and being presented in Sunbrella makes it uniquely versatile unlike any other fiber," said Manoli Sargetakis, principal, Silver State. "With the Sunbrella performance you can use this indoors or out and know it will stand up to everyday life with children and/or pets."

Natural elements like fresh-cut grass and blue skies inspire the colors of the Country Living palette. Names for some of the patterns include Punched Paisley, Daydream and Morning Floral. The collection has 60 skus and 17 patterns.
