

Torino

Aged Leather Alternative

SilverState *fabrics*™

Exclusive Antique Leather Look

Silver State Inc. is proud to introduce their latest Polyurethane faux leather collection, Torino. This is the first *Antique Leather* look being brought to market utilizing the benefits of technology which not only provide an incredibly soft and subtle hand like that of “real leather gloves” but also has a unique sustainable story.

The exceptional drapeability and tailorability of Torino also provides tremendous ease in fabrication. Add to that the high gloss finish of this collection and Torino looks exclusive and luxurious.

Torino’s sustainability story goes above and beyond Polyurethanes already green story. A PVC – free alternative to performance upholstery material, it contains no plasticizers (unlike PVC) and during production, no phthalates are put into the air. The backing material is constructed from 50 percent un-dyed cotton (naturally renewable and biodegradable) and 50 percent un-dyed polyester.
